CallXpress3® Quick Reference Card

Before using CallXpress, you must set up your subscriber mailbox. Begin by following these four easy steps. Remember, each CallXpress system is configured differently, so check with the system administrator for exact instructions.

Once you have set up your subscriber mailbox, follow the Quick Map on the back of this card to use CallXpress3 and its features!

Accessing your subscriber mailbox

1. Enter the CallXpress internal or external telephone number.
2. Enter any other key, such as #, that your system may require.
3. Enter your subscriber mailbox number.
4. Enter your security code. Since this is the first time you have accessed your mailbox, your security code may be set to all zeros.

After entering your security code, you can access all CallXpress features. But first, follow the next three steps to personalize your mailbox.

*Here's all you need
to get your
CallXpress mailbox
up and running!*

Changing the security code

1. Follow the previous steps to access your subscriber mailbox.
2. Press 3 to access PhoneManager.
3. Press 1 to access the Personal Options menu in PhoneManager.
4. Press 4 to change your security code.
5. When asked, enter a new security code with a number combination of 0-9 followed by a # sign. Your security code can be any number of digits from your system's designated minimum to fifteen. Ask the system administrator for the minimum security code length for your system. Try to avoid using simple combinations such as your mailbox number or "1234."
6. Listen to CallXpress repeat the security code you just entered. If your security code is correct, press 1. If it's incorrect, press 9 and re-enter a new security code.

Recording your name to identify your mailbox

1. After changing your security code, press 5 at the Personal Options menu to record your name. When recording your name, don't include an introduction such as "Hello, this is..." since CallXpress already provides an introduction.
2. Press 2 to start recording. Press 2 again to stop recording.
3. After recording your name, you can:
 - Press 6 to review your name
 - Press 4 to discard your name and start over
 - Press * to cancel and exit to the Personal Options menu, without saving your recording
4. When you're satisfied with your recording, press 5 to save it.

Recording a personal greeting for your mailbox

1. Once you have recorded your name, press 3 at the Personal Options menu to record a personal greeting.
2. Press 2 to start recording. Press 2 again to stop recording.
3. At this point, you can:
 - Press 6 to review your greeting
 - Press 4 to discard your greeting and start over
 - Press * to cancel and exit to the Personal Options menu, without saving your recording
4. When you're satisfied with your recording, press 5 to save it.

You are now ready to use CallXpress. You can exit the system or turn this card over and begin exploring the many features inside CallXpress.

GENERAL INFORMATION

PBX stands for Private Branch Exchange. A PBX is the equipment that switches and routes calls internally and externally and provides dial tone for the internal users. The internal users share trunk lines to the local AT&T Central Office.. Private Branch Exchange is the generic name for this type of equipment. You might also see other names used by various vendors such as Private Automated Branch Exchange (PABX), Computerized Branch Exchange (CBX), Digital Branch Exchange (DBX), Integrated Branch Exchange (IBX), or Nippon Electric Automated Exchange (NEAX).

AVT (Applied Voice Technology): Voice Mail/Auto Attendant system at County Admin. Please refer to the CALLXPRESS 3 User Guide for information and instructions regarding Applied Voice Technology. This material should already be available in each department that has access to this system. Quick reference information is included in this directory.

LOCAL CALLS: Dial "9" to obtain an outside line for all local calls. Also Dial "9" when placing 1-800 (or 888, 877, etc.), collect, or credit card calls.

Directory Assistance: The use of Directory Assistance is costly. Employees are encouraged to use alternate ways of finding telephone numbers. The costs incurred for Directory Assistance are monitored. Abuse may be result in charge backs to the Department or individual.

LONG DISTANCE CALLS: From locations other than the County Administration Buildings and those locations that are remotely connected to the County Administration Building by DRU's (Digital Remote Units) or VOIP (Voice Over Internet Protocol), enter 9+1+NPA+NXX-XXXX (NPA= Number Plan Area also known as Area Code; NXX-XXXX = 7 digit telephone number).

FREE CELLULAR CALLS TO THE ADMINISTRATION BUILDING AND NETWORKED LOCATIONS:

AT&T provides a means for making free cellular calls on their systems to the County Administration Building. If you are an AT&T wireless customer with a local calling area that includes Indian River County, you are in your prescribed local calling area, and you are in a location where your cell phone is not indicating a roaming condition, you should be able to dial *IRC and be connected to the County Administration Building with no airtime charge. You can then enter the desired extension number at the County Administration Building or networked location (see below)

NETWORKED LOCATIONS

Several of the telephone systems throughout the County are now networked and extensions in networked switches can call each other using only the 4-digit extension number.

COURTHOUSE, LIBRARIES, 43 AVE ANNEX, ADMINISTRATIVE ANNEX

The voice mail at these locations is provided by a NeaxMail AD-64 located at the Courthouse.

To access the voice mail from your extension, call 4800 and follow the prompts. To access the voice mail system externally, call 770-5185 and at the greeting enter 9 plus your mailbox number (generally your extension number) and follow the prompts.

Dial Access codes for things such as call pickup and call forwarding may vary between locations. If you encounter problems with these functions, please call the Telecommunications Office at 226-1318.

CONFERENCE CALLS:

To conference three telephone lines together, see 3-Way Conversation. To conference four to 12 telephone lines together, contact the Telecommunications Office (226-1318) to schedule use of the conference equipment and receive instructions.

SWITCHHOOK OPERATION:

Switchhook - buttons where handset rests when not in use.

"Depress Switchhook" - <S> - means press down firmly as far as it will go and then release immediately.

Flash - some telephone sets have a flash button to accomplish the "depress switchhook" function. Use the flash button where available.

<S> or FL - means "depress switchhook" or flash.

TONES: The NEC NEAX 2400 generates a variety of tones as indicators of certain conditions. Listed below are the most common tones that will be encountered with the current set of options enabled in the equipment. In trouble-shooting a problem situation, knowing the kind of tone you get can help in resolution of the problem.

Dial Tone (DT) - a continuous, steady tone

Special Dial Tone (SPDT) - same frequency as dial tone but intermittently pulsating 240 times per minute

Busy Tone (BT) - tone intermittently pulsating 60 times per minute

Reorder Tone (RT) - tone intermittently pulsating at 120 times per minute

Service Set Tone (SST) - a continuous 440 Hz tone

To retrieve voice mail messages from outside the building	Call: 567-8000, at greeting enter 1297, proceed as prompted for mailbox and security code

ANALOG TELEPHONES

Telephones with a “hold” button will hold a call, but it is not a system hold and the party on hold will not be connected to the system music and message on hold. Transfer buttons and other specialty buttons may not function properly when operating behind the new digital PBX. Refer problems to Facilities Management.

NEC DIGITAL TELEPHONES

A reference guide for the NEC Dterm telephones is on the shared F drive in a folder called “Product Manuals”. (Constitutional Office Employees – See Your I.T. Manager)
