Executive Summary

The 2014 Children’s Assessment (the “Assessment”) provides data and information on the status and wellbeing of children in the community. The Assessment provides information, which will aid in identifying unmet health and human service needs of the youth population and serve as a basis for planning activities. The Indian River County Children’s Advisory Committee engaged the Health Council of Southeast Florida to conduct the 2014 Assessment.

The Assessment includes secondary data from national, state and local databases and when appropriate and possible, comparative information is presented. Additionally, the Assessment also includes primary data from focus groups and key informant interviews. This results in a comprehensive assessment of both quantitative and qualitative data that will serve well to inform various community stakeholders

The Assessment includes information and data in the following areas:

1. Demographics and Socioeconomics
2. Health and Behavior
3. Education
4. Child Welfare

Demographic and Socioeconomic Profile

This section provides information on a number of key demographic, social and economic indicators such as population, population growth, race and ethnicity and poverty.

Key findings include:

- In 2013, there were 141,994 individuals living in Indian River County, representing .73% of the state’s population.
- In 2013, there were 28,574 individuals 0-19 years of age in Indian River; 20.1% of the county’s population;
- The youth population 0-18 in Indian River’s increased by 18.9% from 2000 – 2013;
- In 2012, 78.2% of the child population from 0 to 18 years of age were white, 16.5% were black and 21.1 % were Hispanic;
- In 2013, 18.9% of families in Indian River with children under 18 were living in poverty; of these, 38.9% had female head of household with no husband present.
- In 2013, 21.3% of children under 18 years were living below the poverty level

Health and Behavior Profile

This section provides information on health insurance, maternal child health, morbidity, immunizations mental health and substance abuse and other indicators including juvenile delinquency and bullying.

- In 2012, 12.4% of youth 0-18 in Indian River were uninsured;
- In 2013, 6.4% of children under 19 years in Indian River were enrolled in the Children's Health Insurance Program (CHIP);
- In 2013, there were 1,217 live resident births in Indian River;
- In 2013, 15.9% of the live births were to mothers with less than a high school education;
- In 2013, 28.2 per 1,000 women were to teens 15 – 19 years of age;
- Indian River had an infant mortality rate of 6.6 per 1,000 live births in 2013;
- In 2012, 24.1% of low income persons in Indian River had access to dental care;
- In 2012, 11.2% of middle school students and 14.2% of high school students in Indian River were obese;
- In 2014 8.6% of high school students reported smoking cigarettes in the past 30 days;
- In 2014, 7.9% of middle school students and 31.8% of high school students reported using alcohol in the past 30 days;
- In 2014, 5.4% of middle school students and 19.8% of high school students reported using marijuana / hashish in the past 30 days.

Education

This section provides information on school attendance, absenteeism, graduation rates, dropout rates, FCAT scores, scholarships and extracurricular activities.

- There are 28,420 children enrolled in school in Indian River;
- In 2014, 56% of 3rd graders scored 3 and above of FCAT reading and 49% scored 3 and above on FCAT math modules in Indian River County;
- In 2014, 58% of 8th graders scored 3 and above on FCAT reading and 18% scored 3 and above on FCAT math modules in Indian River County;
- In 2013-14 school year, the high school graduation rate in Indian River was 79.1%;
- In the 2013-14 school year, 56.62% of students in Indian River were eligible for free/reduced-price lunch.

Child Welfare

This section provides information on child abuse, foster care, marriage dissolutions with minor children and domestic violence.

- In 2012, 10.4 per 1,000 children ages 5-11 experienced child abuse;
- In 2012, 14.7 per 1,000 infants in Indian River were in foster care;
- In 2012, 498.3 per 100,000 children ages 5-11 and 319.2 per 100,000 children ages 12-17 were in foster care;
- In 2012, there were 219 marriage dissolutions, with minor children, in Indian River.

Methodology

At the request of the Indian River County Children’s Advisory Committee, the Health Council of Southeast Florida, (HCSEF) gathered and compiled county and state-level data for the Children’s Assessment. The Assessment includes both quantitative and qualitative data.

The quantitative data are from secondary sources and include (list not exhaustive):

- U.S. Census Bureau
- Florida Agency for Health Care Administration (AHCA)
- Florida Department of Health (DOH)
- Florida Department of Children and Families (DCF)
- Centers for Disease Control and Prevention (CDC)
- Florida’s Bureau of Vital Statistics
- Florida Department of Juvenile Justice
- Florida Department of Education Information and Accountability Services (EIAS)

The qualitative data are a result of primary data collection efforts through focus groups and key informant interviews.

Data was collected, analyzed, and compiled for this Assessment to enable and guide funders, service providers, educators, planners, and community leaders in identifying indicators within the community that are areas of concern, gaps in services, and opportunities for improvement related to the well-being of children in the community.

Introduction

The Indian River County Children’s Assessment was developed at the request of the Indian River County Health Department to provide insight and to help assess the health and wellbeing of children in the county and to provide a guide for planning efforts. The data that comprise this report consist of demographic, socioeconomic, education, health, behavioral and child welfare data. For the purposes of this report, the population of those aged 0-18 were considered as the child population, however for certain data, the ages shown may vary and this is reflected in the narrative.

Demographic & Socioeconomic Profile

Indian River County is located in the Treasure Coast region of eastern Florida. Established in 1925, it is named for the Indian River Lagoon, which runs through the eastern part of the county. Indian River County’s total area is 616.92 square miles, of which 81.57% (503.23 square miles) is land and 18.43% (113.69 square miles) is water. It is bordered by Brevard County on the north, St. Lucie County on the south, Okeechobee County on the southwest and Osceola County on the west and the Atlantic Ocean on the east.¹ In 2010, the density of the county was 274.5 persons per square mile.²

Source: www.efflora.com

The demographic and socioeconomic characteristics of the residents of Indian River County, specifically children, are highlighted in this section. These characteristics are important as they provide context for the health care needs of a community and are strong indicators for health care utilization patterns and health care outcomes. Finally, knowledge about the demographic and socioeconomic profile of a community provides information important to identify specific barriers to accessing health care services.

Data in this needs assessment are presented for Indian River County and in some cases, the state of Florida.

Children and Families Living in Poverty

Children and families living in poverty is defined as those families with children whose income is below the federal poverty level. The federal poverty can change from year to year, and are calculated based on family size and composition. Table 7 below shows the 2013 poverty thresholds. So, a family consisting of two adults and two children was considered to be living in poverty if their annual income was below \$23,624.

Table 7: Poverty Thresholds for 2013 by Size of Family and Number of Related Children Under 18 Years, Indian River

Size of family unit	Weighted average thresholds	Related children under 18 years								
		None	One	Two	Three	Four	Five	Six	Seven	Eight or more
One person (unrelated individual)	11,888									
Under 65 years	12,119	12,119								
65 years and over	11,173	11,173								
Two people	15,142									
Householder under 65 years	15,679	15,600	16,057

Temporary Assistance for Needy Families (TANF)

Figures 1 and 2 show the monthly averages in the number of Temporary Assistance for Needy Families (TANF) benefits and clients in Indian River and Florida for years 2009-2012. In Indian River from 2009 to 2012, the monthly average amount of TANF benefits decreased 16.7% and TANF clients decreased 23.2%. In Florida, during the same time period, TANF benefits decreased 7.3% and TANF clients decreased 8.8%. While TANF benefits and clients continuously decreased between 2009 and 2012 in Indian River, Florida experienced a slight increase in both in 2010, before decreasing again.

Figure 1: Monthly Averages for Years 2009-2012, TANF Benefits and Clients, Indian River County

Figure 2: Monthly Averages for Years 2009-2012, TANF Benefits and Clients, Florida

Homelessness

Table 14 shows the number of homeless individuals in Indian River and Florida in 2009 – 2013. There was nearly a 17% increase in the number of homeless individuals in Indian River between 2009 and 2013. Please see the glossary at the end of this report for the definition of homelessness used by the Department of Housing and Urban Development (HUD).

Homeless Students

Table 15 shows the number of homeless students in Indian River and Florida from school year 2008-09 through school year 2012-13. While the number of homeless students in Florida has been on the rise since the 2008-09 school year the numbers have decreased in Indian River over the past 2 school years. Due to federal law, public schools in Florida use an expanded definition of homelessness in order to include children and youth who do not have a regular nighttime residence. Please see the glossary for the definition of homelessness used by the public schools system in Florida.

Births by Mother's Race

Table 24 shows the number and percentage of births to mothers by race and ethnicity in Indian River County in 2013. The total number of births that year was 1,217, of which 60.8% were born to White women. Just over 20% of the births were to Hispanic women.

Table 24: Births by Race and Ethnicity of Mother in Indian River, 2013

		Indian River	
		Counts	Percentage of Total
Race	White	740	60.8%
	Black & Other	263	21.6%
	Unknown Race	214	17.6%
Ethnicity	Hispanic	251	20.6%
	Non-Hispanic	966	79.4%

Table 25 shows the number and percentage of births to unwed mothers in Indian River County and Florida over a ten year period from 2003 to 2013. During this period, there have been fluctuations, but is notable that as compared to the year before, there was a 4.6% decrease in 2013 in Indian River County, with 570 births to unwed mothers.

Teen Pregnancy

Table 26 shows the number of births and the birth rate per 1,000 individuals to mothers ages 10-14 in Florida and Indian River County from 2010 through 2013. Due to the small number of births in this age group in Indian River County, even small changes in the number of occurrences will influence the rate considerably.

Table 26: Births to Mothers Ages 10-14, Florida, Indian River, 2010, 2011, 2012, 2013

	Number of Births to Mothers 10-14				Rate Per 1,000 Female Population

Figure 5 shows counts and rates per 1,000 births to mothers 10-14 in Indian River and Florida from 2001-2013. The bar graph illustrates the number of births in Indian River and corresponds to the numbers on the left, vertical axis. The rates for Indian River and Florida are shown as line graphs and correspond to the right, vertical axis. The number of births to mothers in this age group in Indian River has fluctuated over the time period shown. Even small changes in the number of occurrences will influence rates considerably.

Table 27 shows the number of births and the birth rate per 1,000 to mothers ages 15-19 in Florida and Indian River County in 2010 through 2013. The number of births to teenage mothers (ages 15-19) in Indian River has been on a downward trend, decreasing from 116 in 2010 to 101 in 2013, and demonstrating nearly a 13% decrease in the number of teenage births. Although the rate in Indian River decreased, in 2013 it was still higher, 28.2 per 1,000 females, than the rate in Florida, 23.8 per 1,000 females.

Table 27: Births to Mothers Ages 15-19, Florida, Indian River, 2010, 2011, 2012, 2013

	Number of Births to Mothers 15-19				Rate Per 1,000 Female Population

Prenatal Care

Table 28 shows the prenatal care status of births in Indian River and Florida for the years 2011, 2012, and 2013. Using the Kotelchuck Index to determine adequate care, the percentage of births in Indian River when the mother had adequate prenatal care (calculated using only births with known prenatal care status) was 74.1% in 2013, a decrease from 78.6% in 2011. Indian River had a greater percentage of births to mothers receiving adequate prenatal care as compared to the state of Florida, for the year 2013.

Table 28: Prenatal Care, Indian River, Florida, 2011, 2012, 2013

	Indian River						Florida		
	2011	2012	2013	2011	2012	2013	2011	2012	2013
	Count			Percentage of births			Percentage of births		
Births to Mothers With 3rd Trimester or No Prenatal Care	50	74	92	4.2%	6.3%	7.8%	4.4%	4.8%	4.9%
Births with adequate prenatal care (Kotelchuck index)	941	930	902	78.6%	78.9%	74.1%	70.3%	70.6%	64.6%

Source: FloridaCHARTS, Florida Department of Health, Bureau of Vital Statistics, 2013

Notes: Percentage of births with adequate prenatal care is calculated by using the number of births with known PNC status as the denominator. *Adequate care is determined by the Kotelchuck Index (Indicates that prenatal care began by at least the 4th month and at least 80% of recommended prenatal visits were received).

Compiled by: Health Council of Southeast Florida, 2014

Table 29 shows the number of births by the trimester in which prenatal care was initiated by zip code in Indian River in 2013. There was a total of 1,217 births in Indian River in 2013. With relatively low numbers of births in some areas, even a few occurrences will significantly influence the percentages.

Birth Weight

Proper prenatal care is important during pregnancy and can reduce the risk of having a low birth weight baby. Table 32 shows the counts and percentages of live births classified as being “low birth weight,” or weighing less than 2500 grams for the years 2010, 2011, 2012 and 2013. During this time, the rate of low birth weight births in Florida remained relatively stable, while the rate in Indian River decreased from 7.9% in 2010 to 7.0% in 2013.

Table 32: Live Births under 2500 grams in Indian River and Florida, 2010, 2011, 2012, 2013

	Number of LBW Births				Number of Total Births				Rate (%)

Table 33 shows the count and percent of live births classified as “very low birth weight,” or weighing less than 1500 grams. The rate in Florida declined slightly in 2013, while the rate in Indian River fluctuating a bit during the same time period. The rate in 2013 (1.2%) is lower than the state’s rate in 2013 (1.5%). Due to the relatively small number of occurrences, the rate may be considerably affected by even small changes in the number of very low birth weight births.

Table 33: Live Births Under 1500 Grams, Indian River, Florida, 2010, 2011, 2012, 2013

	Number of VLBW Births				Number of Total Births				Rate (%)

Infant Mortality

Infant mortality is the death of an infant 0-364 days old. Infant mortality in Indian River County fluctuated significantly between 2010 and 2013. The highest rate, 12.5 per 1,000 live births, was in 2011 and the lowest rate, 6.6 per 1,000 live births was in 2013. The infant mortality rate in Indian River was consistently higher than Florida during this time. Due to the relatively small number of infant deaths and infant births, small changes in the number of occurrences can greatly affect the rate. Table 34 shows the total infant mortality in Indian River and Florida.

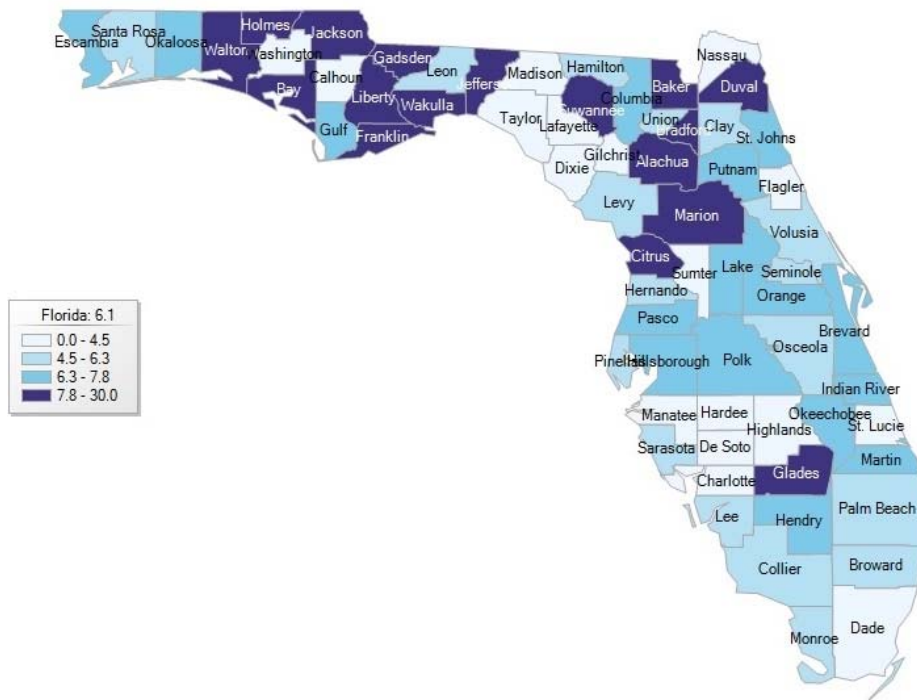

Table 34: Total Infant Mortality (0-364 days) in Indian River and Florida, 2010, 2011, 2012, 2013

	Number of Infant Deaths				Number of Total Live Births				Rate Per 1,000

Figure 7 shows infant mortality rates in Florida counties in 2013. Indian River, with a rate of 6.57 per 1,000 live births, is in one of the top tiers of counties with the highest infant mortality rates. Florida’s rate during this same time was 6.1 per 1,000 live births.

Figure 7: Infant Deaths per 1,000 Live Births, Florida by County, 2013

Data source: Florida Department of Health, Bureau of Vital Statistics

Table 35 shows infant death per 1,000 live births by race in Indian River County and Florida from 2009 to 2013. Infant death rate was highest among nonwhites in both in Indian River County and Florida. There was a significant increase among Black and other races in the county in 2012 and then the rate decreased significantly in 2013. The infant mortality rate in Indian River was consistently higher than Florida during the past several years. Due to the relatively small number of infant deaths and infant births, small changes in the number of occurrences will significantly affect the rate.

Table 35: Infant Deaths per 1,000 Live Births by Race in Indian River and Florida, 2009- 2013

Childhood Mortality

Table 37 shows the number and crude rate of childhood deaths, for children 0 to 17 years old, in Indian River County and Florida from 2009 through 2013. During the period shown, the rates fluctuated in Florida and Indian River. In 2013, the childhood death rate in Indian River increased to 66.3 per 100,000 individuals in the age group, up from 62.4 in 2012. Due to the relatively small number of occurrences, a small change in the number of occurrences will influence the rates.

Table 37: Childhood Deaths, Indian River, Florida, 2009, 2010, 2011, 2012, 2013

	Number of Childhood (0 -17) Deaths					Crude Death Rate Per 100,000

Sexually Transmitted Diseases

Table 39 shows the sexually transmitted disease (STD) rate in Florida and Indian River County for those 15-19 from 2010 through 2013. The bacterial STDs include: Chancroid, Chlamydia, Gonorrhea, Granuloma inguinale, Lymphogranuloma venereum (LGV) and Syphilis. Though the state's rate per 1,000 has been on a consistent downward trend during this period, the rates in Indian River County have fluctuated a bit, but have decreased over the past couple of years and have also been lower than Florida's rates during this same time. In 2013, Indian River had a rate of 19.6 per 1,000 while Florida had a rate of 21.0 per 1,000.

Table 39: Bacterial STDs in Ages 15-19, Indian River, Florida, 2010, 2011, 2012, 2013

Vaccine Preventable Diseases

According to the CDC, vaccine-targeted age groups include children who are less 5 years old, adults over the age of 65, pregnant women and women 2 weeks postpartum. Table 40 shows the numbers and rates of vaccine preventable diseases for vaccine-targeted age groups in Indian River County and Florida from 2009 through 2012. Due to the relatively small number of occurrences, an even small change in the number of occurrences will influence the rate.

Enteric Disease

Table 42 shows enteric disease cases and rates in children less than 6 years of age from 2010 to 2012 in Indian River and Florida. Enteric diseases include probable and confirmed cases of Campylobacteriosis, Giardiasis, Hepatitis A, Salmonellosis, and Shigellosis. The rate decreased in Indian River during 2010 and 2011, but more than doubled in 2012.

Access to Dental Care

Table 44 shows access to dental care by low-income persons living in Indian River County and Florida in 2010, 2011, and 2012. In 2010, it is noteworthy that 60.2% of low-income persons reported having access to dental care in Indian River, compared to 36.4% in Florida. The rates in Indian River and Florida were comparable in 2011 and 2012.

Table 44: Access to Dental Care by Low Income Persons, All Ages, Indian River, Florida, 2010, 2011, 2012

WIC Participation

WIC is a special supplemental nutrition program for women, infants, and children (WIC) that provides supplemental foods, health care referrals, and nutrition education for low-income pregnant, breastfeeding, and non-breastfeeding postpartum women, as well as infants and children up to age 5 who are at nutritional risk.³

Table 45 shows the number of individuals eligible for WIC benefits who were served in 2009 through 2012. During the time period shown, the rate of WIC eligible individuals served fluctuated in Indian River and Florida however, Florida consistently had higher rates than Indian River. In 2012, Indian River had a rate of 78.7 per 100,000 individuals, compared to 82.9 per 100,000 in Florida.

Table 45: WIC Eligibles Served, Indian River, Florida, 2009, 2010, 2011, 2012

Overweight and Obesity

Overweight and obesity have become an epidemic in the United States. Children who are overweight or obese are at risk for chronic diseases in childhood, including diabetes, high cholesterol, and high blood pressure. According to the CDC, children whose BMI is at or above the 95th percentile are considered obese.⁴

Table 46 shows children older than 1 year of age in the WIC program who were overweight or obese in 2010 – 2012.

Mental Health and Substance Abuse

Tobacco Use

Table 51 shows the percentage of middle school students in Indian River and Florida who reported 'current cigarette use' from 2002 through 2014. Current cigarette use is defined as having smoked one or more cigarettes during the past 30 days. While the rate in Florida has been on a steady downward trend, the rate in Indian River has fluctuated, with a sharp increase between 2008 and 2009. In 2014, 3.0% of Indian River County middle school students reported smoking cigarettes in the past 30 days.

Table 51: Middle School Students Who Report Smoking Cigarettes in the Past 30 Days, Indian River, Florida, 2002-2014

Alcohol Use

Alcohol is the most widely used and abused drug among U.S. youth, even more so than tobacco and illicit drugs. Alcohol is responsible for over 4,700 underage youth deaths every year. In 2010, emergency room visits by persons under 21 years of age accounted for about 189,000 visits due to injuries and other conditions related to alcohol.⁵

Table 53 shows the percentage of middle students in Indian River and Florida, from 2004 – 2014 who reported consuming alcohol in the past 30 days. The percentages decreased in Florida during this time, but have fluctuated considerably in Indian River. In fact, in 2010, 21.2% of the middle school students reported having used alcohol in the past 30 days in the county. From that point, there has been a considerable decrease in Indian River, with a low of 7.9% in 2014, which is considerably less than Florida's (10.1%).

Table 56 shows the percentage of high school students in Indian River and Florida who reported binge drinking in Indian River County and Florida from 2004 through 2014. This percentage represents the number of students reporting having 5 or more drinks in a row in the past 2 weeks. Both the county and state rates decreased in the time period shown, however, Indian River had a greater percentage point decrease, 10.2, versus 8.3 in Florida. However, in 2014 the rate in Indian River (14.9%) was still higher than in Florida (13.7%).

Attendance

Table 61 shows student school attendance by average daily attendance and the average daily membership from the 2012-2013 school year. The Average Daily Attendance (ADA) is the average number of students present each day school is in session. The Average Daily Membership (ADM) is the average number of students on the current school roll each day school is in session. For the time period shown, Florida and Indian River had similar percentages of students present, 94.3% and 94.1%, respectively.

Table 61: Student Average Daily Attendance (ADA) / Average Daily Membership (ADM), 2012-2013 School Year

	Days Present	Days Absent	Total Student Days	Percent Present	ADA	ADM
Indian River	3,158,705	199,682	3,358,387	94.1%	17,548	18,658

Kindergarten Readiness

Table 64 shows the Florida Kindergarten Readiness Screener (FLKRS) results in Indian River and Florida for the 2012-2013 school year. To obtain FLKRS results, elements from the Early Childhood Observation System (ECHOS®) and the Florida Assessments for Instruction in Reading (FAIR) are used in combination. See the glossary for a more complete description. In the 2012-13 school year, Indian River students fared better on both ECHOS® and FAIR readiness screeners compared to students in Florida as a whole. 92.0% of Indian River students were deemed ECHOS® ready and 78.0% were deemed FAIR ready, as compared to Florida's 91% and 72% respectively.

Table 65 shows the calculated district readiness rates by school site for Pre-K program in 2012-2013 based on Fall 2013. The table below illustrates the distinction between charter schools and the other school within the Indian River school district. Data shows Florida Kindergarten Readiness rates were higher in charter schools which averaged 87%, 19 percentage points greater than the average non-magnet schools in the county's school district. Two magnet schools (Osceola and Rosewood) achieved scores that were comparable to charter schools and even exceeded north charter and Imagine charter school scores.

Florida Comprehensive Assessment Test (FCAT)

The Florida Comprehensive Assessment Test started in 1998 as the state’s plan to increase student achievement by way of implementing higher standards in the areas of mathematics, reading, writing, and science. During the 2010-11 school year, Florida began transitioning from FCAT to FCAT 2.0 and the Florida End-of-Course (EOC) Assessments, changing some of the logistics of testing, but still including the same areas of study. Please see the glossary at the end of this report for a description of FCAT scoring. Table 66 shows the percentage of students in Indian River County and Florida, grades 3 – 10, scoring 3 and above on the FCAT 2.0, in 2013 and 2014.

Table 66: Students Scoring 3 and Above on FCAT, Indian River, Florida, 2013 and 2014

Table 67 shows FCAT math percentage rates for achievement level three and above for Indian River schools grades 3 to 8 in 2013. Asian, Non-Hispanic had the highest percentage from 3 through 7 grade, with the exception of the 5th grade at which White non-Hispanic students excelled greatest. Black or African American Non-Hispanic students ranked lowest at all grade levels.

Students Not Promoted

Table 69 shows the number and percentage of elementary and middle school students in Indian River and Florida not promoted in 2010 – 2012. In Indian River, the number of elementary school students not promoted ranged from 149 to 224 (1.9% - 2.7%) and the number of middle school students not promoted ranged from 54 to 145 (1.3% - 3.5%).

Table 69: Elementary and High School Students Not Promoted, Indian River and Florida, 2010, 2011, 2012

	Indian River				Florida	
	Elementary		Middle School		Elementary	Middle School

Graduation Rates

Table 70 shows high school graduation rates in Indian River and in Florida for the 2009-10 school year through the 2013-14 school year. The graduation rate in Indian River in the 2013-14 school year was 79.1% a slight decrease from the previous school year and a bit higher than Florida's rate of 76.1% during the same year. Please see the glossary at the end of the report for a description of the federal graduation rate.

Table 70: Federal High School Graduation Rates, Indian River and Florida, 2009-10 - 2013-14

County	2009 -10	2010 -11	2011 -12	2012-2013	2013-2014
Florida	69.0%	70.6%	74.5%	75.6%	76.1%
Indian River	67.2%	71.7%	80.9%	80.1%	79.1%

Notes: The federal uniform graduation rate replaces the National Governors Association (NGA) rate, which is no longer calculated.

Dropout Rate

A student who withdraws from school and does not transfer to another school or other education program is counted as a dropout. The dropout rate is the percentage of 9th through 12th students who dropout compared to the total, yearlong student membership of 9th through 12th graders.

Table 71 shows the 9th through 12th grade single-year dropout rates for Indian River County and Florida from 2009-10 to 2013-14. Indian River had consistently lower dropout rates than Florida during the time period shown. During the 2013-14 school year, 0.4% of students in Indian River dropped out of high school as compared to Florida's dropout rate of 4.3% during the same year.

Table 71: Single-Year, 9th -12th Grade Dropout Rates, Indian River, Florida, 2009-10 -- 2013-14

	2009 - 10	2010 - 11	2011 - 12	2012 - 13	2013 - 2014

Stability Rate

Table 72 shows the stability rates in Indian River and Florida for the 2012-2013 school year. The stability rate is the percentage of students from the October membership survey who remain enrolled in the second semester survey (February). Membership refers to the total student population. The stability rates in Indian River and Florida were similar in the 2012-13 school year, 95.5% and 95.2%, respectively.

Table 72: Stability Rates, Indian River and Florida, 2012 - 2013

	October 2012 Membership	February 2013 Membership	Stability Rate
Florida	2,685,794	2,556,838	95.2%
Indian River	17,796	17,003	95.5%

Free and Reduced Lunch

Table 75 shows school lunch program eligibility in Indian River County and Florida from the 2008-09 school year through the 2013-14 school year. Federal Income Eligibility Guidelines (IEGs) are used to determine each student’s eligibility for free and reduced price meals. Over the past several years, the number of students eligible for free/reduced-price lunch had steadily increased in Indian River until this last school year when there was a slight decrease. During the 2013-14 school year, more than half, 56.62%, of pre-kindergarten (PK) through 12th grade students in Indian River County were eligible for free or reduced-price lunch.

Table 75: PK-12 Students Eligible for Free/Reduced-Price Lunch, Indian River, Florida, 2008-09 - 2013-14

	Florida			Indian River		
	Total Number of Students	Total Eligible Students	% of Eligible Students	Total Number of Students	Total Eligible Students	% of Eligible Students

Emotionally Handicapped Students

Table 81 shows the percentage of students in Indian River County and Florida, grades K-12, who were emotionally handicapped, in 2011, 2012, and 2013. This indicator includes children who are emotionally handicapped (EH) and severely emotionally disturbed (SED). In 2013, 0.5% of the student population in Indian River was considered emotionally handicapped compared to 0.7% in Florida. The percent in Indian River has remained stable during the time period shown.

Scholarships

The Florida Bright Futures Scholarship Program is Florida's largest merit-based scholarship and provides scholarships based on high school academic achievement.

Table 84 shows Bright Futures Scholarship disbursements between 1997 and 2014 in Indian River County and Florida. Additionally, the table shows the percentage of total scholarship disbursements that Indian River students received. In the 2013-14 school year, Indian River students received 0.67% of the total Bright Futures Scholarship money disbursed in the state of Florida.

Table 84: Bright Futures Scholarship Disbursements 1997-98 – 2013-14

	Florida	Indian River	
	Disbursements	Disbursements	% of Total Disbursements
1997-98	\$69,263,553	\$345,522	0.50%
1998-99	\$93,906,554	\$533,284	0.57%
1999-00	\$131,849,245	\$769,577	0.58%

Table 87 shows number and rate of verified child abuse cases in Indian River County and Florida for fiscal year 2012-13. Verified cases of child abuse include an unduplicated number of children who were considered alleged victims of child maltreatment and upon investigation, the determination was made that they did indeed endure some type of maltreatment. In 2012-13 in Indian River, 1.12% of children were victims of verified child abuse.

Table 87: Verified Child Abuse Rate, Indian River, Florida, Fiscal Year 2012-13

	Number of Verified Cases 2012-13	Child Population Ages 0-17	Rate (%)
Florida	49,289	4,016,465	1.23%
Indian River	288	25,787	1.12%

Foster Care

Table 89 shows the number and rate of infants who were in foster care in Indian River and Florida in 2008 through 2012. The rate decreased substantially in Indian River from 33.5 per 1,000 individuals in 2008 to 14.7 per 1,000 individuals in 2012. Even though the rate decreased in Indian River, in 2012 it was still higher than the rate in Florida (11.7 per 1,000 individuals). Due to the relatively small number of occurrences, a small change in the number of events will influence the rate.

Table 103 shows the relative rate (RR) index compared with White Juveniles in Indian River County in Florida from July 2012 to June 2013. Relative risk (RR) is the ratio of the probability an event occurring (for example, developing a disease, being injured) in an exposed group to the probability of the event occurring in a comparison, non-exposed group. Black or African American youths had the highest RR for juvenile arrest (4.67), therefore, Black or African American youth were nearly 5 times more likely to be arrested than their white counterpart.

Table 103: Relative Rate Index compared with White Juveniles, Indian River, July 2012 – June 2013

Group Quarters

Table 104 shows the population who resides in group quarters by, sex, age and the type of group quarters in Indian River in 2010. The under 18 years population accounted for 16.7% of the total (1,794) individuals living in group quarters, additionally this age group also accounted for 17% of the total institutionalized population (1,346) in the county. However, the largest Institutionalized group quarters in Indian River at that time were Juvenile facilities (41%) and correctional facilities (35%). Figure 10 shows each Institutionalized group quarter category and the portion for which they account.

Table 104: Group Quarters Population by Sex, Age and Type of Group Quarters in Indian River, 2010

Subject	Number	Percent
AGE		
Group quarters population	1,794	100%
Under 18 years	299	16.7%
Institutionalized population		
Under 18 years	229	17.0%
Noninstitutionalized population		
Under 18 years	70	15.6%
TYPE OF GROUP QUARTERS		
Group quarters population	1,794	100%
Institutionalized population	1,346	75.1%
Correctional facilities for adults	480	26.8%
Juvenile facilities	548	30.5%
Nursing facilities/Skilled-nursing facilities	255	14.2%
Other institutional facilities	63	3.5%
Noninstitutionalized population	448	25.0%
College/University student housing	89	5.0%
Military quarters	0	0.0%
Other noninstitutional facilities	359	20.0%

Marriage Dissolutions

Table 105 shows the numbers and rates of marriage dissolutions with minor children in Indian River County and Florida between 2008 and 2012. Marriage dissolutions include divorces and annulments. In 2012, the marriage dissolution rate involving minor children was 1.57 per 1,000 individuals in Indian River County, a slight increase from the rate in 2011, 1.43 per 1,000.

Table 105: Dissolutions of Marriage With Minor Children, Indian River, Florida, 2009, 2010, 2011, 2012

	2009		2010		2011		2012	
	Number	Rate per 1,000	Number	Rate per 1,000	Number	Rate per 1,000	Number	Rate per 1,000
Florida	29,647	1.58	31,602	1.68	32,470	1.71	30,702	1.61
Indian River	239	1.74	258	1.87	198	1.43	219	1.57

Domestic Violence

Table 106 shows the rate and number of domestic violence offenses in Indian River County and Florida from 2010 through 2013. During this time period, the rate in both the county and state decreased. In 2013, Indian River had a rate of 4.1 per 1,000 individuals, and Florida had a rate of 5.6 per 1,000 individuals. The number of offenses in Indian River ranged from 691 to 581 in the time period shown.

Table 106: Domestic Violence Offenses, Indian River, Florida, 2010, 2011, 2012, 2013

	2010		2011		2012		2013

Community Perspective

Overview

The second phase of Indian River Children's Needs Assessment consisted of the collection and synthesis of information for the Community Perspective. The data contained herein is qualitative, primary data – it was obtained directly from the source and has not been previously published. This information was collected through: focus groups with members of the community and key informant interviews.

The target populations and stakeholders for the key informant interviews were identified and engaged by the Health Council of Southeast Florida (HCSEF) under the advisement of an Advisory Group.

Key Informant Interviews - Methodology

Eleven (11) in-depth key informant interviews were conducted with community stakeholders, representative from a broad range of sectors, including: law enforcement, faith institutions, community members/parents, school administration, juvenile justice, child care, judicial and county government.

The purpose of the informant interviews was to collect information from a wide range of individuals with first-hand knowledge about the community, available services and resources. Their particular knowledge and understanding provided insight on the nature of problems and made recommendations for solutions.

Each key informant interview was led by a skilled facilitator and lasted approximately 20-30 minutes and were conducted from August through September 2014. Interviews were conducted in English via telephone. The facilitator provided an overview of the process at the beginning of the interview and informants were assured that responses would only be presented in the aggregate. Interview discussion points used to guide interview, included the following (See Appendix A for tool):

- What do you perceive are the key issues related to children's well-being?
- What do you think are the biggest problems related to children's well-being in the Indian River community?
- What services, programs, and resources do you believe are lacking in the community (example Age groups, geographies, race and ethnicity)?
- What services, programs, and resources in the community are strong and/or beneficial (what's going well)?
- Please offer suggestions for how to improve services and programs for children.

Key Informant Interviews – Results & Common Themes

The following information was generated from the responses of the community stakeholders in Indian River. We have identified the primary opinions and thoughts of the group, their input and specific points. The unordered list of responses to each open-ended question is listed to address each query.

What do you perceive are the key issues related to children’s well-being?

- Family stability; good home life
- Quality child care and education
- Meeting basic needs for food, shelter and clothing
- Safe environment where people care about them
- Ability to grow and develop
- Access to services to help them grow and thrive
- Physical, dental and mental health

What do you think are the biggest problems related to children’s well-being in the Indian River community?

Poverty:

- The biggest issue is poverty and economic-based issues
- Creates challenges with health and juvenile justice
- Disparity between very wealthy and very poor
- Pockets of poverty (Wabasso, Gifford, South Oslo)
- Lower middle class affected the most
- Homelessness
- Not a lot of industry

Parental Involvement/Parenting Skills/Family:

- Family stability is key
- Family is the most important institution
- Lack of parenting / parental support
- Parents need to reinforce values; help foster good choices
- Children don’t get proper framework
- Challenges with single parent families
- Lack of quality time with parents (parents working)
- Lack of communication between parent and child
- The ‘broken family’
- Parents’ lack of education – creates challenges navigating the system

Substance Abuse

- Substance abuse and domestic violence at the core of a lot of issues
- Parental substance abuse and youth substance abuse
- Synthetic drug use
- Two fold impact:
 - Behavior of parents
 - Access by the children

Domestic Violence/ Abuse / Neglect

- Lots of children being charged with sex-related crimes
 - More than other counties in the circuit
 - Some have been victims of crime
- Highest number of cases of abuse and neglect
- Domestic violence, both children and parents
- Parents reporting bullying as an issue

What services, programs, and resources do you believe are lacking in the community? (Informants were asked to note any specific sub-populations, e.g. age groups, geographies, race and ethnicity).

Extracurricular Activities/ After-school Activities

- Lack of activities and social outlets
- Areas of community are in need of more activities
- Pay to play sports
- Lack of youth sports organization
- Not many activities for youth (12 -21 years)

Transportation

- Transportation is a major problem
- Transportation to certain areas in community
 - Central Vero
 - Gifford and Fellsmere
- Transportation within the schools; no late bus

Unaware of Services

- Need more awareness of services
- Lack of effective ways to communicate with families parents and children about programs and services
- Good programs, people may not know about them

Childcare / Daycare

- Quality child care and education is at the core of well-being
- Access and availability of child care of 0-2 populations
- Out of school care for working parents
- Long wait lists (largely due to funding)
- Not enough foster families

Mental Health

- Lack of access
- Areas within the county for help, but very difficult to get an appointment
- No early intervention or prevention services when problems are identified early
- Children with anger, behavioral, social and emotional problems

What services, programs, and resources in the community are strong and/or beneficial, i.e. what's going well?

Things that are going well – Positive(s)

- Strong community support, “everyone wants to help!”
- Boys and Girls Club
- Gifford Youth Activity Center
 - Black Male Mentoring Program at Gifford Youth Activity Center
- Youth Guidance Program
 - Good base of mentors
- Florida Institute of Technology partnership
- Police Explorer program
- St. Vincent de Paul- food bank
- Elementary afterschool program
- Free and reduced lunch program
- Early Learning Coalition
- Life for Youth Ranch
 - Summer program
- Operation Hope
- Americorp
- Big Brothers, Big Sisters
- Substance Abuse Council
- Civil citation
 - Alternative for law enforcement for first offenses and minor offenders
- Roundtable
 - Community leaders concerned about youth
- Child care
 - High quality providers; ongoing professional development
- Restoration rehab on homes
 - Promotes community pride (Gifford)
- Dental services
 - Connection between dental and general health
- Physical screenings
 - Immunizations
- Bridges out of Poverty
- Cub Scout
- Fellsmere Exchange Club
 - Program supporting youth growth and development

Please offer suggestions for how to improve services and programs for children.

Suggestions

- Address transportation problems
- Develop more effective ways increase awareness of programs and services
- Low cost/ no cost programs/services are needed
- Fund the existing programs; make them available to more kids
- School district should collaborate with other organizations to bring programs to kids as an extension of their day
- Focus more on the family unit and help parents
 - Improve parenting skills
- Programs to help parents
 - Learn to read and with parenting skills
- Better day care for single moms
- Offer trauma-informed care/therapy
- Have resources dispersed across the county so people don't have to travel so far
- Introduce children to more 'social' things; provide opportunities to interact
- Develop a way to find/connect with the kids earlier so they bridge into the schools easier and we can develop relationships and trust over time

Considerations

- When things work well, leave them alone
- The quality of services is as important as the number of services
- There are a lot of services, but there isn't a lot of collaboration

Focus Groups - Methodology

Seven (7) focus groups with members of the community were conducted from August through October 2014. The dates, locations, times are in Table 105. The purpose of the focus groups was to glean insight from specific populations and sub-populations in the community who are considered underserved or otherwise vulnerable. These target populations included: certain geographic sectors within the county, parents, Spanish-speaking individuals, females, and underserved individuals and represented households/families. HCSEF enlisted the assistance of several agencies and individuals within the community to assist in recruiting focus group participants.

Each focus group was led by a skilled facilitator, accompanied by a note-taker. Not including the introduction and overview, each group lasted approximately 60 minutes. Six (6) focus groups were conducted in English and one (1) was conducted in Spanish. A total of 98 individuals participated in the group, with between 9 – 17 individuals per group. Refreshments were provided at each session and participants were incentivized to participate with \$25 Walmart gift cards, which were distributed at the end of the session. Each participant completed a demographic questionnaire prior at the start of the focus group and an aggregation of this information is provided in Tables 106-113, below. The participants were asked a series of 9 pre-determined, open-ended questions. These questions can be referenced in Appendix B. The questions sought to gain insight, not only on individual's interaction and perception of the community's services related to children, but also on possible suggestions and ideas to enhance and improve what is currently available. All participants were informed at the beginning of the session that the session was being audiotaped. Participants were assured that names would not be attributed to the responses given, but rather the information would be presented in the aggregate through the identification of common themes and threads.

Methodology Notes:

- The geographical area known as the Gifford community was oversampled due to pre-existing knowledge that this community has a significant underserved population.
- Participants in a number of the focus groups faced challenges filling out the demographic forms, which is believed to be due the their literacy level. HCSEF facilitators assisted participants, when it was recognized that help was needed, in completing the forms, often by reading the questions and recording the answer on the sheet based on the response.
- The 'no answer' categories are a catch all for those who preferred not to answer as well as those who left the field blank. It is hypothesized that many of the 'no answers' are a result of challenges with literacy.

Table 107: Focus Group Locations, Dates, Times, and Number of Participants

Location	Date	Time	Number of Participants
Gifford Youth Activity Center	8/21/14	5:30pm	14
RCMA (facilitated in Spanish)	8/27/14	5:30pm	17
Treasure Coast Community Health Center	9/17/14	5:30pm	9
The Preserve at Oslo Apartments	10/23/14	5:30pm	12
Gifford Youth Activity Center	10/24/14	10:00am	14
Fellsmere Community Prayer & Worship	10/27/14	6:00pm	15
20th Street, Vero Beach (Crossover Mission)	10/28/14	6:30pm	17

Focus Groups - Participant Information

Table 108: Focus Groups - Zip Codes

Zip Code	# of Participants	% of Participants
32946	1	1.0%
32948	27	27.6%
32958	4	4.1%
32960	9	9.2%
32962	19	19.4%
32963	1	1.0%
32966	3	3.1%
32967	30	30.6%

What is the highest grade or year in school you have completed?	# of Participants
Less than high school	13
High school / GED	31
Some college, no degree	23
Associate or Bachelor degree	18
Graduate degree	15
Other	2

Focus Group - Results & Common Themes

To facilitate the discussion within of the focus groups, participants were asked a series of nine primary questions about their perception of child well-being, their experiences and degree of satisfaction with the public system in the community related to children’s services. In addition, some of the primary questions included sub-questions (See tool in Appendix B). Listed below are the primary themes, categorized, that emerged during of the seven focus groups.

“What does children’s well-being mean to you?”

- “Whole” child
- Basic needs
 - Food, shelter health and clothing
- Education
- Safe and nurturing environment
 - Safety in the community
 - Area that has emergency preparedness plan
- Well taken care of
 - Healthy and clean
- Health care
 - Immunizations, vision, and hearing
 - Prenatal care

- Health insurance
- Physical activity
- Socialization
- Positive self-image / self-esteem
- Receive proper education
- Parental Support and Involvement
 - Proper emotional and physical support
 - Parents acknowledge responsibility
 - Children to know they are loved
 - Help children be successful in the environment they are in
 - Helping set goals
- Spiritual well-being
- Morals, values and respect

“What services/programs/resources are most important in the community for the overall well-being of children?”

- Education
- Health care
- Child care/daycare center
- Familial and parental involvement
- Support and guidance
- Transportation
- Out-of-school programs

“What aspects of a community are most harmful to the well-being of children (in general)?”

- Poor education
- Dangerous/harmful environments
- Poverty
- Lack of awareness and linkage to services
- Lack of transportation
- Lack of accessible child care and daycare centers
- Lack of out-of-school programs

“What do you think are the biggest problems related to children’s well-being in the Indian River community?”

- Poverty
- Lack of transportation
- Lack of accessible child care and daycare centers
- Lack of out-of-school programs
- Lack of awareness and linkage to services

“What are the barriers to accessing services for children you’ve experienced or know of others experiencing?”

- Cultural/racial and language barriers
 - *“We went to black schools and had black teachers...they cared about us as students”*
 - *“Many of our students don’t see anyone who looks like them; they don’t have anyone they can relate to”*
 - *Accessing local services and only see “white faces”*
 - *“People feel they are not good enough because they are in the black community”*
- Lack of transportation
- Lack of accessible child care and daycare centers
- Lack of out-of-school programs
- Lack of income
- Lack of awareness and linkage to services
- Travel to and from sports activities
 - *“I know of a family with 3 young children who could not get help that they needed for them. Because the resources that they needed were so far and with no transportation, and heavy rain almost every day, they could not get where they needed to go.”*

“What services/programs/resources do you believe are lacking in the community?”

After-school Programming

- There are not enough activities for the children
 - *“Children need a place to gather instead of wandering the streets”*
 - *“When children don’t have enough to do, they are going wild”*
 - *“Kids have too much spare time and get into trouble”*
- Need more, affordable and better before and afterschool programming
 - Need more recreational programs to keep kids busy
 - Need programs for young kids and teens that don’t require a fee
 - Not enough structured or sports programs in the community
 - Need programming during school breaks and summer
- Programming primarily offered in Sebastian or Vero Beach
- Lack of programming in south County
- Individuals may not want to go to programs on church grounds

Education / Schools

- Some children have to go to school far away from their communities because local schools have closed
- There are waiting lists (especially for 3 year olds)
- Pre-kindergarten lottery
- Students don’t “see anyone who looks like them”
- Focus is on athletics and not on education

Health Care

- Health insurance too expensive
 - Employer insurance often high contributions and co-pays
- Have to travel to (West) Palm Beach for speech therapy or specialty care
- Long wait times with some providers

- Need to focus on prenatal care (include young men too)
- Lack of programs to assist with pregnancy prevention
- Need mental health services
- Mental health stigma prevents some people from accessing services

Other

- Poverty
 - Seasonal employment
 - Lack of financial security
 - No middle class; residents either very wealthy and poor
- Crime
- Bullying in schools; children threatened
- Gun violence and gangs in the park and in the community
- Need collaboration amongst service providers
- Need people to work together more
- Lack of awareness and linkage to services

Participants were asked about the strong/beneficial services/programs/resources in the community and explain positive experiences related to services and programs for children.

Specific Organizations, Programs & Services

- Gifford Youth Activity Center
- Boys & Girls Club
- Feed the Lambs Enrichment Program
- Feed the Lambs Electrical Training Program
- Indian River Tae Kwon Do
- Head Start
- Early Steps
- Daisy Hope Center
- Harvest Food Bank
- Community church on 25th
- RCMA
- Housing Authority
- Food banks / food pantries
- Treasure Coast Community Health
- Habitat for Humanity
- Faith-based Community & Churches
 - Grace Baptist Church
 - St. Helen's Church
- Indian River County Health Department
- 2-1-1 pamphlet/resources sheet
- Sororities and fraternities
- Mentorship and scholarship
- Behavioral Clinic
- Cross-over mission
- Career Source

Participants also provided additional feedback and suggestions on how to improve and enhance the current system of care for children in Indian River County.

Suggestions:

- Transportation to and from programs
- More programs to teach trades to teens
- After-school programming and low or no cost sports
- Pre-school focused programs like Head Start and Reading Readiness
- Utilize social media to communicate with youth
- Tutoring programs
- Time extensions for day care and preschool (morning and evening)
- More spots available for day care
- More appreciation for teachers
- Classes for mothers and fathers on parenting
- Mentoring programs for parents
- Mentoring programs for men
- Literacy programs
- Help navigating 'the system
- Opportunities to expose children to experiences outside the community

Prioritization of Needs

The Health Council of Southeast Florida worked with the Indian River Children's Services Advisory County to identify individuals to serve on a cross-sectional team for the purposes of conducting this assessment. These individuals comprised the Indian River Children's Services Advisory Group (See Appendix C). The group had thirty-six (36) members.

The Advisory Group was initially convened in June 2014, with the intent of having topical experts and key community stakeholders that would review and vet all of the quantitative and qualitative data contained in this assessment for the purpose of identifying the key issues or priorities as related to children's needs in Indian River County. These priorities would also serve as the foundation to the development of a comprehensive plan.

The Indian River Children's Advisory Group met six times between June 2014 and December 2014. These meetings consisted of review and discussion related to the quantitative and qualitative data. The quantitative data consisted of demographic and socioeconomic indicators, including: child population, race/ethnicity, cost of living, homelessness, maternal and child health, oral health, mental health, substance abuse, education, graduation rates, child welfare, morbidity and mortality as well as data related to health resource availability and access including: health insurance coverage and the safety net in the community.

After all data was presented and vetted, HCSEF staff presented a 'Trigger Report', which essentially recapped and highlighted pertinent points. At that point, participants provided their thoughts, ideas, and suggestions on the issues, needs, challenges, and barriers affecting children in Indian River County. The following list (in no ranked order) is the result of that sessions:

- Marketing availability of services available to the community
- Social media and other methods of promotion
- Recreational and after school activities (free or affordable)
- Mentoring and tutoring programs
- Transportation (proximity to services)
- Activities for the teen population
- Pre-school and early childhood programs and school readiness
- Mental health and early identification and supportive services for children ages 8-12 years old
- Specific mentoring programs for males in need
- Early age literacy focusing on 3rd grade students
- Parental enrichment, spiritual and social classes
- Community building (playgrounds)
- Peer-to-peer support
- Childcare Services
- Substance abuse programs

During the last session, attendees further discussed the issues as identified above and then participated in a multi-voting exercise through which they ranked (and ultimately prioritized) the list.

The following six (6) focus areas were identified as the priorities (in ranked order):

1. Early childhood development
2. Build parent capacity and family stability
3. Out of school enrichment activity programs
4. Middle and high school programs that address risky behaviors
5. Mental health
6. Marketing of availability of services

Important to note are the additional areas that were discussed considerably:

- parent education
- transportation
- homelessness of children
- basic needs
- dental care
- health
- women's health
- advocacy
- poverty
- family/parent income
- job placement

Conclusion

Communities face the challenge of balancing the desire to provide access to quality health and human services with decreasing resources and increasing demand. This Children's Assessment will enhance the community's and stakeholder's understand of the characteristics, health status and the needs of the children in Indian River County. This will serve the community well in planning for services and in resource allocation towards improving the wellbeing of the county's children.

Glossary

ECHOS® is an ongoing observational assessment system that takes place inside the classroom. Conducted by the teacher, students are observed during their ongoing daily activities, such as working, building, problem solving, and interacting with peers. This measure is based on national standards in seven domains: Language and Literacy, Mathematics, Social and Personal Skills, Science, Social Studies, Physical Development and Fitness, and Creative Arts. ECHOS® readiness is ranked in three different ways: Not Yet Demonstrating (ND), Emerging/Progressing (EP), and Demonstrating (D). To be considered ECHOS® ready, a student must be either EP or D.⁶

FAIR is a system of assessments designed to measure a student's progress, diagnose learning needs, set instructional goals, and monitor instructional progress. The FAIR-Kindergarten (FAIR-K) administered to all public and private kindergarten children, consists of a Broad Screen/Progress Monitoring Tool, which includes letter naming and phonemic awareness; and Broad Diagnostic Inventory, which includes a listening comprehension and a vocabulary task. The outcome of these two tasks helps determine a child's reading success. In order for a student to be considered FAIR ready, they must have a probability of reading success score of 67% or higher.⁷

FCAT Scoring: Reading and math FCAT scores range from 1 to 5, with 1 meaning that the student demonstrates an inadequate level of success with the challenging content of *Next Generation Sunshine State Standards* and 5 meaning that the student demonstrates mastery of the most challenging content on the *Next Generation Sunshine State Standards*.⁸ Students in 3rd grade must score a Reading score of 2 or higher in order to continue on to grade 4. Students in 10th grade must score a 3 or higher in order to be eligible for graduation. A score of 3 indicates a satisfactory performance on the test.

FLKRS is a screening tool that uses the aforementioned subset of ECHOS® and the first two aforementioned measures of the FAIR-K. To be deemed ready, a student must score a proficient score on both ECHOS® and FAIR.⁹

Graduation Rate: Federal regulations require each state to calculate a four-year adjusted cohort graduation rate, which includes standard diplomas but excludes GEDs, both regular and adult, and special diplomas. The US Department of Education (USED) adopted this calculation method in an effort to develop uniform, accurate, and comparable graduation rates across all states. The USED required states to begin calculating the new graduation rate in 2010-11. This graduation rate is currently used in Florida's school accountability system in the high school grades calculation. This version replaces the National Governors Association (NGA) rate, which is no longer calculated, for high school grades accountability.

Homelessness:

The Department of Housing and Urban Development (HUD) recognizes homelessness as:

⁸ <http://fcats.fldoe.org/mediapacket/2013/pdf/2013UFR.pdf>

⁹ <http://www.palmbeach.k12.fl.us/agenda/Wednesday,%20September%202012,%202012%20School%20Board%20Meeting%209-19-12/B9E13A6E-A2AA-44DA-B2C2-EC84A3C0860F.pdf>

- People living in a publicly or privately operated shelter that provides temporary living arrangements;
- Those persons whose primary nighttime residence is a public or private place that's not intended to be used as an accommodation for human beings. These may include: a car, parks, buildings that have been abandoned, train stations, or camping grounds;
- A person who is exiting from an institution, where he or she lived for 90 days or less, but was homeless before entering the institution
- A person who is fleeing due to issues with domestic violence;
- A person who will lose their primary nighttime residence within 14 days, and has not found another residence, and the person lacks the resources to obtain permanent housing.¹⁰
- The State of Florida reports the number of students who are identified as homeless to the Florida Department of Education. Due to federal law, public schools in Florida use an expanded definition of homelessness in order to include children and youth who do not have a regular nighttime residence. This broader definition includes children who are:
 - Sharing the housing of other people due to loss of housing, economic issues, or the like;
 - Living in motels, hotels, trailer parks, and camping grounds, due to limited options of other housing;
 - Living in emergency transitional shelters;
 - Left in hospitals or are waiting to be placed in foster care;
 - Living in a public or private place that's not intended for use as a regular sleeping accommodation for human beings;
 - Living in cars, parks, abandoned buildings, bus or train stations or who are living in substandard housing or the like; and
 - Migratory children living any of the aforementioned circumstances.¹¹
